Quality policy of Labtech

"It is the established policy of Labtech Limited to satisfy its customers with goods and services which exceed their continually rising expectations.

The company aims to achieve this by the use of a fully integrated Quality Management System.

The key elements of this system are :-

Continuous process monitoring together with Advanced Quality Planning to ensure that quality is built into our products, and that we are consistently able to meet customer time to market and time to volume requirements.

Customer and supplier partnerships, to ensure requirements are fully appreciated and efficiently satisfied to our mutual benefit.

The establishment and maintenance of an environment which encourages all employees to pursue never ending improvement in the quality and productivity of products and services throughout the company."
